Memo No L 6620/D 17-12-48

7821/6

From the Chairman C & T Board, Tezpur
D.O.C. - 263/HS-46 d 30-4-46
states that the Trust Board has
resolved to acquire the mulberry gardens
and staff quarters (with grounds) in Fort-Mohalla
Tezpur, at an estimated cost of Rs 15-4-0
for laying it out into building plots in the
interest of the health of the people in the
Charmuchuram Extension, and requests
orders as to whether the usual acquisition
proceedings have to be instituted in respect
of these properties, which belong to the Sericultural
Deptt or whether the Govt would hand it over
to the Trust Board, free of cost.

Secy

36 It has been resolved in a meeting of the Trust Board to acquire the Mulberry Garden belonged to the property of the Govt Cultural Department — in view of complaints received from the residents of Chamundipuram that it is proximity an asset for Malaria in that locality, and to convert the garden into building sites Please see paras 4 to 6 of the letter dt 25.11.46 - flag "W" in the file It is not clear why this. Subsequent to this letter, there has been attempt to obtain expert opinion of the Malariologist to justify the Boards resolution for them to acquire the said gardens.

37 The point now at issue is that the Trust Board offers Rs 15,440/- for the Gardens, and the contention of the Dept of Secretariat has been that the value given is very low and, as determined by them, cannot be less than Rs 30,000/-, particularly since the Trust BS got from them some what actually cost nearly Rs 1,34,000/- (para 3 of the letter dt 13th March '48)

38 The inconvenience caused in such cases will cause in entrusting the

establishment of a Similar garden elsewhere and much of dislocation of work, the heavy gains that accrue to the Dept Bd, by this acquisition, — this kind support to the Conservation of the Sericultural Septs and [redacted] the Dept Board to choose between

offering to the Septs adequate Compensation i.e., Rs 30, 000/- and taking over the buildings reserved to also for nurseries stated by the Sept Sericulture

2 and bearing the entire Cost of the Septs establishing Similar garden elsewhere.

39) Subject for kind perusal and orders

Pool 23/4

40 1 Sericulture is an auspicious industry unique in Mysore, & deserves, as such, all possible encouragement Encouragement is also the declared policy of Govt

41 2 Mulberry is a Commercial Crop and the Dept should not be penalised by being paid less

42 3. Acqn should be based on Market rates prevailing and of the owner were a freeholder he would have right to retain

as a Court of law. A Private owner should not be placed at a disadvantage

43 For these reasons, the Respondents submit that the Petitioners should get a writ of Mandamus such amount as will enable them to put up a wire fencing as prima encroachments and it is desirable to argue them

(Reddy) 23/11/65

44) It is pointed out above that the opinion of the Malariologist has not been obtained Re whether the existence of these gardens has contributed to the spread Prevalence of Malaria & that they are proving harmful to public Health opinion on this point should be obtained un-officially

Retransmitted with compliments

The Chairman in his letter No B2 C 263/45-46 dated 30th April 1946 to the Secretary to Government, Revenue Department has made a statement that the Health Officer Mysore City has given the opinion that the prevalence of malaria in the area under reference is due to the existence of mulberry gardens From a reference to the letter from the Municipal Engineer, Mysore to the Health Officer, Mysore City No L T 271/45-46 dated 15th January 1948 and the latter's reply thereto, it is found that the Health Officer has not mentioned anything about the existence of malaria in the area but has made a vague statement that if the mulberry gardens are removed, it will tend to improve the public health of the place He has not however, given any opinion to the effect that the place is malarial and that this malaria will be improved if the gardens are removed

31/8

C

31/8/48

Acquisition of mulberry gardens etc.

B344/mal

Nyasa

47) Further, the Chairman in his letter No B2 C 263/45-46 dated 18th April 1946, addressed to Government has stated in para 2 that the Director of Public Health is also of the opinion that the mulberry gardens which are surrounded by extensions should be acquired On a reference from this office to the Chairman in this regard he writes in his letter No B2 C 263/45-46 dated 3rd June 1948 that there is no written opinion of the Director of Public Health on this matter and that the Chairman has made a Note to this effect in his own handwriting in the file on 4th May 1947

48) I am afraid I do not remember the circumstances under which the Chairman has recorded this Note I neither remember the time nor the circumstances under which I said so As this was an important matter, the Chairman should have got it confirmed by me if I had made such a statement at all.

49) Personally I am of opinion that there is no malaria hazard in the area surrounded by mulberry gardens The Superintendent, Bureau of Malariology is also of the same opinion

O Gabbanna

Director of Public Health

50) In view of the opinion of the Director of P H at para 46 & 49 supra, the orders of the Mulberry gardens in Nyasa may be required at all ?

RETURNED WITH COMPLIMENTS

The Director of Public Health in para 49 supra, as pointed out by the Revenue Secretary, has definitely stated that there was no malaria hazard in the area surrounded by mulberry gardens In agreeing to shift mulberry gardens from Mysore originally, I had relied on the specific mention made by the President, Trust Board, that it was the view of the Health Department that the existence of the mulberry garden was conducive to malaria But this has proved to be incorrect, and as the shifting of the mulberry garden and farm involves inconvenience to this Department, and as the existence of the mulberry garden itself has the effect of a lung space in the extension, I am of the definite opinion that it is absolutely unnecessary to shift the mulberry garden from the existing site

Superintendent of Sericulture
in Mysore

To

J B Mallaradhya, Esq , M A ,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Revenue Department, Bangalore

Sir,

Re - Acquisition of Mulberry Gardens near Chamundipuram, Mysore

In forwarding herewith a copy of the Trust Board Resolution No 397 dated 27th March 1946 re the above, I have the honour to state as follows -

1 The residents of Chamundipuram Extension have been complaining of malaria on account of the proximity of the above gardens These gardens are getting enclosed by the new buildings coming up in the locality As such as a natural sequence the garden cultivation has to cease in the interest of public health The Health Officer, City Municipal Council has also reported that the prevalance of malaria is due to the existance of the Mulberry gardens and as a measure to check the spread of malaria it is proposed to acquire the gardens leaving the Office buildings of the Department and lay-out of sites for buildings A further reason for acquisition of the Mulberry garden is the proximity of the New Thulsidas Mohandas Maternity Hospital which is nearing completion A copy of the Health Officer's Note in reply to the Mumicipal Engineer's letter is enclosed for favour of reference

2 The estimated cost of acquisition inclusive of the staff quarters works up to Rs 15,440/-, and the cost of acquisition will be paid after the garden lands are handed over to the Trust Board

3 As the properties proposed for acquisition belong to the Government Sericultural Department instructions are requested whether acquisition proceedings have to be instituted or the Government will kindly order that the properties noted in the enclosed estimate and sketch be handed over to the Trust Board free of cost

I have the honour to be,
Sir,
Your most obedient servant,

Chairman

Sir,

Sub -Acquisition of mulberry gardens near Chamundipuram, Mysore

With reference to your No L 12835/R/E dated 17th May 1946 forwarding to me copy of letter No B2-C-263/45-46 dated 30th April 1946 received from the Chairman City Improvement Trust Board Mysore on the above subject and asking for my opinion I have the honour to state as follows -

Prior to 1917 when the Government silk worm rearing house and Central School were located in a rented building in Krishnamurthipuram the mulberry garden had been located on a piece of land in front of the present Sarada Vilas High School As this land was required by the Trust Board for formation of a Park etc , the garden was uprooted lands suited for the mulberry garden, buildings etc were then personally selected by the Dewan and the present piece of land was placed at the disposal of the Sericulture Department by the Trust Board at the instance of Government in 1920 The extent of 15 acres 22 guntas of land was taken to the possession of the Department and mulberry was planted in 1921 By this time the Central School and the rearing operation were transferred from Krishnamurthipuram to the Old Exhibition Buildings where also the Government Filature was located About 5 acres 37 guntas of land adjoining the mulberry garden was given to the Department in 1930 for extension of garden and another piece of 2 acres 11 guntas of land on the Northern Side along the Viceroy Road was given to the Department in 1930 on the instructions of the Dewan who desired that the whole piece of land between Viceroy Road and Mananthody Road should be utilised for the mulberry garden and for locating the buildings connected with the silk industry Thus the total extent of land in the possession of the Department is 23 acres 30 guntas of which most of the portion excluding the area occupied by the buildings of the office of the Superintendent of Sericulture and the rearing and grainage rooms has been planted up with mulberry The question of paying compensation to the Depa

Department of Sericulture by the Trust Board for having disturbed the mulberry garden from the land occupied prior to 1917 was finally settled by Government a per G O No T C 5486-8/A & E 183-23-20 dated 9th February 1925 On taking possession of the lands given to the Department on different dates, considerable amounts of money have been spent to prepare the land to plant mulberry, to fence the area to arrange for draining off the area etc An irrigation well with a pump house etc cost the Department over Rs. 6,000/- Several varieties of mulberry obtained from Japan have been planted and several experiments including menurial experiments experiments regarding raising mulberry tope different systems of planting and cultural operations are being carried out

3 Even though the mulberry garden was located on the present piece of land the rearing operations were being carried out at great inconvenience in the Old Exhibition Buildings situated about 1½ furlongs away When it was decided by Government to construct suitable separate buildings for the Government Filature at Mysore a site on the Northern Side of the mulberry garden along Mananthody Road and contiguous to the mulberry garden was selected by Government When it was decided by Government that a Government Silk Weaving Factory should be started the site for the Silk Weaving Factory was also settled along Mananthody Road contiguous to the mulberry gardens Finally it was decided by Government that the Office of the Superintendent of Sericulture and the rearing and grainage buildings should be located adjacent to the mulberry garden so that all the operations connected with the Silk Industry from mulberry cultivation silk reeling and the manufacture of finished silk fabrics should be located in the same locality and contighous to each other

4 The present mulberry garden has been in existence for nearly 25 years When it was decided to locate the Filature and the Weaving Factory on the land contiguous to the mulberry gardens, the Chairman of the Trust Board and Dr Sweet of the Rockfeller Institute jointly inspected the locality and finally agreed to the location as there was no question of adversely affecting the sanitary or health conditions of the locality A malaria survey was later on conducted by the experts of the Public Health Department Mysore and this indicated that malaria in Chamundipuram was not due to the existence of themx mulberry gardens but due to the existence of other lands to the East and South As far as I know the residents of the locality appreciated the existence of the mulberry gardens as the area acted as a sort of park and lung space

5 There is no reason why the mulberry garden should be taken to be the

cause of malaria There are over two thousand villages in the State having mulberry gardens round about and there is no complaint regarding malaria in these villages Mulberry requires only about one tenth of the water required by rice and irrigation if done at all is done once in ten days There are no pits, cess pools etc , in the gardens and water does not stagnate in a mulberry garden In fact mulberry is not planted in wet fields at all as there should be good drainage facilities for am mulberry garden It is not understood how the mulberry garden at Mysore can be said to be the cause for malaria in the locality This point can only be settled by taking the expert opinion of the malarialogist of the Public Health Department I request that this may be done at an early date

6 The mulberry garden at Mysore cannot be termed "garden cultivation" Most of the area of the garden is depending upon rain water as only a small portion can be irrigated during the summer season The Government mulberry garden at Mysore is kept clean and well drained and does not give room for breeding malaria mosquitoes

7 If the mulberry garden is given over for building houses etc , then the only available lung space would be built over The maternity hospital is under construction The buildings could very well have been put further away from the mulberry gardens as there was plenty of vacant space available

8 If after obtaining expert opinion of the Malariologist of the Public Health Department it is found that the mulberry gardens have to be given up, then the question of shifting the Filature and the Silk Weaving Factory also will have to be taken into consideration as these factories consume a largeqx quantity of water and this water coming out of the factories has to be satisfactorily disposed of

9 If for any reason the present mulberry gardens have to be given up, then the office of the Superintend of Sericulture and the rearing and grainage rooms will also have to be shifted to the new locality in the interests of efficiency of rearing and grainage operations The Tru t Board will have to provide about 20 acres of land at their cost within easy distance of Mysore City and suited for raising the mulberry gardens and for construction of buildings The cost of raising the new garden and of construction of the buildings will also have to be borne by the Trust Board The present garden cannot be given up immediately as that would upset the work If it is decid

decided that the present garden has to be given up, then that can on, when the new garden is ready along with the required buildings

10) I regret the delay in sending a report as old records had to be se before formulating the report

I have the honour to be,
Sir,
Your most obedient servant,

Superintendent of Sericulture

Re:- Acquisition of Mulberry gardens near Chamundipuram, Mysore

---

With reference to your letter No L 8737 dated the 16th December 194(re the above, I have the honour to state that the letter received from you was placed before the Board at its meeting held on 26th March 1947 The Trust Board has resolved that in view of the urgent need for house sit(in that area, the garden lands may be acquired A copy of the Trust Boar(Resolution No 456 dated the 26th March 1947 is enclosed for kind perusal It is learnt that the Sericultural Department are having a plantation near Nachanahalli and they may shift this also to that place As regards the source of meeting the expenditure the scheme will be taken up as a self-supporting one in view of the fact that the investment will be realised by the sale of sites

The Director of Public Health is also of opinion that the Mulberry gardens which are surrounded by extensions should be acquired

In these circumstances, early orders of Government may kindly be obtained sanctioning the acquisition

I have the honour to be,

Acquisition of mulberry gardens near Chamundipuram for layout of Extension

Adverting to your letter No L 572 dated the 8th July 1947, re the above, I have the honour to state that the letter in question was placed before the Board in their Meeting held on 27th August 1947 and the Board have resolved regretting inability to select land elsewhere or to meet the cost of raising another garden As the land is urgently required for layout of an extension, it is also resolved to acquire the land immediately A copy of the Trust Board Resolution No 52 dated the 27th August 1947 is enclosed for kind perusal

In this connection, kind reference is invited to Para 3 of this office letter of even number dated the 29th April 1946 requesting to intimate as to whether acquisition proceedings are to be instituted or the same be handed over to Trust Board free of cost If it is not possible to hand over the same free of cost the estimated cost of acquisition viz , Rs 15,440/- may kindly be advanced from Government and the same will be repaid after the sites are sold

In view of the keen demand for sites, I request that early orders of Government may kindly be obtained in the matter

Sub -Acquisition of mulberry gardens in Mysore City by the Mysore Trust Board

With reference to correspondence ending with your letter No L 1013 dated 1-10-1947, forwarding a copy of letter No B 2 C 263/45-46 dated 10th September 1947 from the Chairman Mysore City Improvement Trust Board Mysore, I have the honour to state that the Trust Board have valued the mulberry gardens at Rs.15 440/ This valuation is too low The total area in the holding of this Department is 21 acres as per details noted below -

1	Planted Bush mulberry including foot paths, irrigation channels well	10 A -30 G
2	Mulberry tope	5 -21
3	Vacant Land	4 -29
		21 A - 0 G

The City Improvement Trust Board appeared to have valued the lands on the usual basis obtainable in Municipalities It is presumed that they do not propose acquisition of the two buildings one belonging to the Mysore Govt Silk Farm and the other where the Office of the undersigned is situated The valuation of the Mysore Silk Farm garden cannot be on the basis on which the ryots' ordinary gardens are valued The farm was established for experimental purposes, and comprises plantations of various methods different systems of training experimental manurial plots, and plots for raising foreign varieties and for grafting etc As a result, laying out such garden is very much more expensive than the usual garden of the ryot In fact the garden has been laid out at considerable expenses Besides, there is a well and pump house, whose value cannot be less than Rs.10,000/- In view of these considerations the basis for the valuations must altogether be different from the one adopted by the Trust Board The scientific method of valuing the garden ~~would be~~ would be the estimated amount required for establishing a similar garden in a
